

**2010  
Hydrant  
Flushing**

**New Daytime Hydrant Flushing Schedule begins May 17**

Hydrant flushing serves an important dual purpose of removing sediment and iron deposits from the mains and it also provides a check of the working conditions of hydrants to insure the best fire protection for our community.

**2010 Program Highlights**

**NEW**

Hydrant flushing will occur during daytime hours—from 8 a.m. to 4 p.m.—Monday through Friday.

- Hydrant flushing begins May 17 and ends June 30, 2010.
- Barricades and signs will alert residents and drivers of areas of hydrant flushing.
- Water may appear discolored after flushing . . . allow the cold water to run until it clears up.

**PLEASE CHECK YOUR WATER BEFORE USING IT.**
